SERVICES AND FEES / INDIA

Business Services Catalogue

Practical services to attract enquiries, organise follow-up, take bookings and payments, improve customer communication and simplify everyday operations. Choose one service or combine several into a connected solution.

The ranges below are service fees for the stated scope, in INR before applicable tax. Your quote confirms the exact fee. Software access, paid tools, message/call/AI usage, external purchases and optional support are separate unless explicitly included. The lower end assumes straightforward delivery using supplied material; more work within the scope moves the fee towards the upper end.

How your quote is built

One-time or recurring. Each row states whether the fee is one-time, per campaign, per session or per month. Monthly production fees include the stated deliverables; initial setup is shown separately.

Software and optional tools. We confirm the access needed and identify subscriptions you already pay for. A separate paid tool is added only when the selected solution needs it.

Usage and third parties. Messages, calls, AI activity, payment processing and external suppliers are billed separately at actual provider cost in this guide. Any different handling or service charge must be stated in your written quote.

Support after launch. Optional support covers an agreed work allowance. Production or campaign management already included in a service is not charged again as support.

Shared setup. When services share the same setup, we scope the combined solution and count shared work once. Unless stated otherwise, one brand, one language and one location are included.

Results and responsibilities. The service delivers the agreed system or work. Sales, search rankings, ad reach, review ratings, message delivery and AI accuracy depend on additional factors. Content, access, ownership and export arrangements are confirmed before work starts.

Your written quote. Shows the selected service and quantities, exact setup fee, recurring service work, software, estimated usage, external purchases, support allowance, billing terms and applicable taxes.
